

## **WHY CHOOSE US TO DO YOUR GASTROSCOPY AND COLONOSCOPY**

We care about all our patients and aim to deliver an excellent level of care to each one.

We are very thorough and take multiple samples to diagnose your problems. We test for reflux, coeliac disease, H.Pylori –stomach bacteria and if discussed prior to the procedure then also testing for lactose intolerance can also be arranged.

We love what we do and aim to solve your problem, reach a diagnosis and help your symptoms.

Experience of over 20 years

We ensure the wait is very short as we have multiple endoscopy lists each week in different locations including week days and Saturdays.

We discuss with you on the day after the procedure all the findings, give you copies to your family doctor and a copy to you if requested.

We also have a recall system to recall you for future procedures if needed.

We are also able to follow you up after the procedure and treat any findings as required and discuss short and long term plans of any conditions found.(Please note: not all endoscopists provide this service)

Our pathology does not charge out of pocket fees.

Our anaesthetist does not charge out of pocket fees.

We deal with very experienced gastrointestinal pathologists who report your samples.

We use consultant anaesthetists.
